- 45R02

CENSUS OF NEWFOUNDLAND, 1945

Gainfully Occupied

Classified According to Occupation and Industry by Age, Income,
Industrial Status, Marital Status, Sex,
Years of Schooling, etc.

Report No.
ON-2

CR. N
B3 1
-452

PREFACE

The tables in this report chiefly contain statistics of the gainfully occupied and wage-earners as compiled from the 1945 Census of Newfoundland. Both categories include only persons 14 years of age and over.

Table 43, the first table of this report, shows the numerical and percentage distribution of the population, 14 years of age and over, by economic status, age, and sex for Newfoundland as a whole. Figures dealing with the gainfully occupied and wage-earners are given in Tables 44 to 53 and in Tables 54 to 59, respectively. The gainfully occupied are classified in this report by occupation and industry according to such demographic and economic characteristics as age, sex, marital status, years of schooling, industrial status, and amount of income for the 12 months prior to the census date, October 1, 1945, while the wage-earners are shown by selected occupations and industries according to average earnings in each pay period, weeks of unemployment during the 12 months ending September 30, 1945, and sex. This information is given primarily for Newfoundland as a whole although a certain amount of the data are also presented for the city of St. John's as well as for census districts.

The reports in this series represent final tabulated results from the Census of Population, Agriculture and Fisheries, taken by the Newfoundland Government in 1945. These tabulations have been carried out in the Dominion Bureau of Statistics at the request of Newfoundland.

Herbert Marshall

Dominion Statistician.

November 1, 1949

Definitions of Terms and Explanations

(a) Gainfully Occupied

Gainfully Occupied: A gainfully occupied person, for census purposes, is one who owns and/or operates a farm, mine, fishing gear, or other business, such as a store, repair shop, restaurant, etc., or is engaged in a trade or profession, such as a carpenter, plumber, doctor, dentist, lawyer, etc., with or without paid assistance as well as one who is employed by others on a wage, salary, commission, piece rate, or no pay basis. A person who has been employed or engaged in the manner outlined above is considered as gainfully occupied even though unemployed for some period prior to the census date providing he (she) intends to seek gainful employment subsequent to that date. Children not attending school and employed most of the time at some occupation or who regularly assist parents in the operation of a farm, store, etc., with or without pay, are also considered as gainfully occupied. However, children working at home merely on general household duties or at odd times at other work as well as women doing housework in their own homes without salary or wages are not included with the gainfully occupied.

Occupation Inquiry: Enumerators were instructed to report precisely the "present regular" occupation of every gainfully occupied person at the time of the census. Thus, a person whose regular occupation was "fisherman" but who was temporarily occupied as a "logger" at the time of the census would be reported as "fisherman" whereas a person occasionally employed as a "fisherman" would be reported as a "logger" if the latter was his regular occupation.

Industry Inquiry: In addition to the "present regular" occupation reported, each gainfully occupied person was asked to state the nature of the industry in which this occupation was carried on. It was pointed out to the enumerators that the same occupation might be found in entirely different industries. "A mechanic", for example, "may belong to the mining industry or to the automobile repair industry and a fisherman may be engaged in the cod fishing industry or the herring fishing industry".

Occupational versus Industrial Classification: The gainfully occupied are classified by occupation and industry in the tables of this report. The group titles in these tables are similar but the composition of the groups is different. For example, the group "Manufacturing", in industry tables, includes all persons employed by manufacturing firms, whether engaged in the processes of production, or in the sale or transport of the product, or in clerical or other occupations associated with the industry. On the other hand, in the occupation tables found in this report only such persons as follow so-called "processing" occupations, that is, occupations in which they are directly engaged in the process of manufacture or repair, are included in the group "Manufacturing", and all persons following such occupations are classified in this group, irrespective of whether they were employed by manufacturing firms or by mining, construction, transportation, etc., companies at the time of the census. Similarly, the groups "Construction", "Transportation", for example, in industry tables include all persons employed in these industries irrespective of the nature of their occupations, while the occupational groups, "Construction", "Transportation", appearing in the occupation tables, comprise only those persons who were following construction trades and transport occupations, respectively, at the census date, regardless of the industries in which they were employed.

It might be mentioned that persons in clerical occupations have been assigned a separate place in the tables, while labourers in other than primary pursuits appear in a residuary group in these tables. Since the term "labourer", so reported, gives no indication of the type of work performed, it cannot be classified under any of the occupation groups shown in the tables. Even a knowledge of the industry in which employed does not supply the necessary information on the type of work performed by a person reported as a labourer, for a labourer in a steel mill, for example, might be working in a construction, transport, etc., type of occupation rather than in an occupation directly concerned with the process of manufacture.

Income Inquiry: Enumerators were instructed to report "the total income of every person from all sources", i.e., money received as salary, wages, commissions, interest, pensions, dividends, profit from the operation of a business, etc. The total income received was to be for the period of 12 months ending September 30th, 1945, however, in those cases where figures were not available for this period, enumerators were to accept total income figures for the most recent 12 month period for which figures were available.

It should be mentioned that income figures are published in this report for gainfully occupied persons, 14 years of age and over, only. The inclusion of similar data for non-gainfully occupied persons would have added very little worthwhile information since fewer than 2,000 persons in the latter category reported income at the time of the census.

Industrial Status of Gainfully Occupied: The gainfully occupied population is classified in this report according to the manner in which they carried on their business or the manner in which they were employed by others, i.e., whether they were occupied in an employer, own account, wage-earner, or no pay capacity. These terms are defined as follows:

- (a) Employer: An employer is a person who operates his (her) own business and employs others therein. However, a person who manages a business for someone else and in so doing has the authority to hire employees, as well as the person who operates his (her) own business merely with the aid of unpaid help (namely, unpaid family workers), is not an employer.
- (b) Own account: An own account person is one who operates his (her) own business without the assistance of wage or salaried employees. However, he may be aided by unpaid help.
- (c) Wage-earner: A wage-earner is a person who works for an employer on a salary, wage, commission, or piece rate basis.

- (d) No pay: A no pay worker is a gainfully occupied person who receives no specified cash pay in return for the work. This class includes chiefly family workers on farms, in fishing, and in stores as well as some employees of institutions and religious orders who receive room and board but no specified money for their services.

Classes of Not Gainfully Occupied: All persons 14 years of age and over excluded from the gainfully occupied, as defined above, are shown separately in Table 43 of this report where they are classified by age according to the following classes:

- (a) Home-makers, i.e., women doing housework in their own home, without salary or wages, and having no other employment. This class includes a few single women keeping house for parents or relatives but, of course, does not include housewives who have some gainful occupation. Therefore, since a housewife, engaged chiefly in some economic activity during the census year, is considered as gainfully occupied, it is evident that the term "homemaker" is not exactly synonymous with that of "housewife".
- (b) Retired, i.e., persons who had at one time been gainfully occupied but who, on account of old age, permanent physical disability, or other cause, no longer had a gainful occupation at the time of the census and did not anticipate accepting further employment in the future.
- (c) Students, i.e., young persons, 14 years of age and over, regularly attending school, college, university or receiving private tuition, including any who were earning money after school as messenger, newsboy, etc. Only when not attending school and employed most of the day in some gainful employment would they be considered as gainfully occupied.
- (d) Inmates of Institutions: Inmates of institutions at the date of the census were segregated, irrespective of their economic status at the time of the census, for purposes of census classification and are shown in Table 43 as part of the "not gainfully occupied" category. Only persons in prisons, reformatories, jails, and penitentiaries as well as in mental institutions, veterans hospitals, and places for the aged, incurables, and feeble-minded, i.e., in institutions in which the individuals are restrained by force of law or in which they remain for long periods of time, are considered as inmates of institutions for this purpose. Staffs of these institutions and members of such institutional households as convents, isolation, maternity, etc., hospitals, at the time of the census are, of course, included with the gainfully occupied population.
- (e) No occupation: This is a residual class which includes all persons 14 years of age and over who were neither gainfully occupied nor members of one of the not gainfully occupied classes shown above.

Nomadic Indians: In view of the difficulty experienced in classifying Indians as gainfully occupied or as not gainfully occupied, it was thought best to show those 14 years of age and over in a separate category in Table 43 without reference as to their economic status. Those, 14 years of age and over, who were gainfully occupied at the time of the census are, therefore, excluded from the gainfully occupied and wage-earner statistics in this report.

(b) Wage-Earners

Wage-earner: See "Industrial Status" for definition of this term.

Present Wage Rate: In order to obtain some statistical data on wage-rates, two columns were included on the Population Census Schedule for this purpose. In the first of these columns the enumerator was required to enter the wage rate paid to each wage-earner while in the second he was to state the period to which the amount reported was applicable. Wage rates were to be reported for the hour, day, week, fortnight, month, and year, depending upon the conditions of employment in each case. Persons hired by the year were to report a per annum rate rather than a rate for the month, fortnight, etc., even though they were actually paid at monthly, fortnightly, etc., intervals.

It was apparent, from the rates reported on the schedules, that some wage-earners stated an amount and a pay period other than the one which formed the basis of their employment and which was used as the basic rate for calculating their periodic pay. Thus wage-earners hired by the year reported, at times, a monthly rate and pay period, those hired by the hour reported a weekly, fortnightly, or monthly, rate and pay period, etc., because their pay cheque covered such periods of time. However, the basic rate received by the individual is generally reflected in the rate reported even though occasionally it is for a period other than that of actual employment.

(1) Includes gainfully occupied not reporting age, marital status, and years of schooling.

(2) N.e.s. = Not elsewhere specified.

(3) N.o.s. = Not otherwise specified.

Notes.- A slight correction in the number of male "Accountants and auditors" and "Owners and managers in manufacturing" was necessary since the publication of Bulletin ON-1.

marital status, years of schooling, and industrial status, for Newfoundland, 1945

(1) Includes wage-earners not reporting rate of earnings.

(2) Average rate is not shown in cases where fewer than 5 persons reported the particular pay period for an occupation or occupation group.

(3) N.e.s. = Not elsewhere specified.

(4) N.i.f. = Not in factory.

Table 55. Wage-earners, 14 years of age and over, by selected occupation and sex, showing the number reporting earnings and the average earnings in each pay period, for the city of St. John's, 1945 - Con.
